

# SilverSky Security Services

Change the Rules of Engagement

## Why SilverSky?

**4,000+**  
Customers

**10+ YEARS**  
Average Customer  
Retention

**98%**  
Customer  
Satisfaction

**20+ YEARS**  
of Experience

**3 SOCs**  
North America,  
Europe, Asia

**300+**  
Cybersecurity  
Experts

**150+**  
Industry  
Certifications

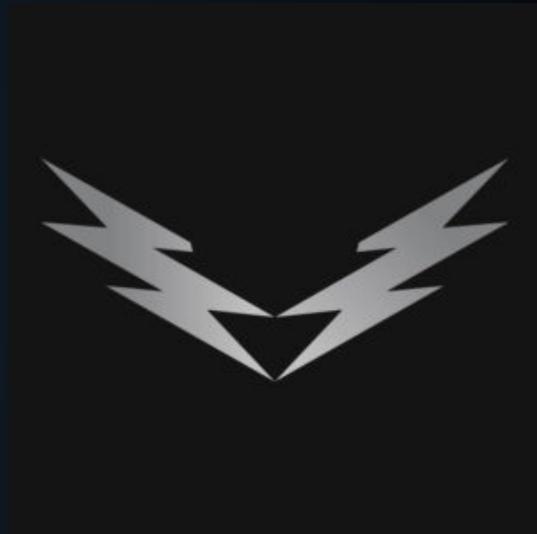

## SilverSky Security Services

With a set of core values like no other

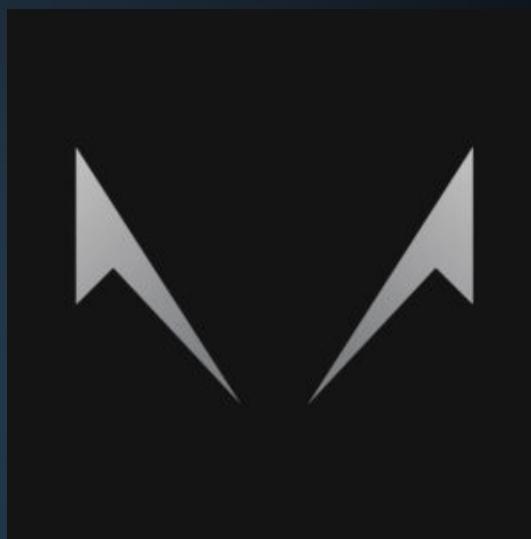

### VISION

The Vision to be an advanced technology company, developing the depth and complexity of analysis to shield our customers from cyber risk, regardless of their size or sophistication.

### VELOCITY

The Velocity to attach cyber risk at light speed, constantly ramping up our rate of learning, and slashing the time to detect and respond.

### VIGILANCE

The Vigilance to combine military-grade behavioral tracking and machine learning, together with human analysis and support, to protect our customers' attack surface as vigorously as their bottom lines.

Our authority to operate in some of the most sensitive government networks puts compliance at the core of our company.

## SilverSky Security Services

Enterprise-grade cybersecurity delivered on-demand equals peace-of-mind

**Regardless of their size or industry, organizations face common barriers to cybersecurity effectiveness. We level the playing field with access to powerful cybersecurity.**

Digital transformation, remote work, distributed office locations, and an ever-changing global regulatory landscape are testing the bounds of traditional security – and introducing new risk. With cybersecurity complexity and costs accelerating, effective solutions can seem out of reach and hard to integrate.

Modern organizations like yours need protection delivered in a way that is simple, accessible, and fits your budget. In the face of today's cybersecurity challenges, it makes sense to partner with a firm like SilverSky.

SilverSky has one of the most comprehensive sets of cybersecurity services in the industry. Delivered as a managed services model with on-demand access, our services are backed by enterprise-grade, integrated technology and the skilled expertise to run it. Our security operations centers monitor your on-premise, cloud, or hybrid environment for threats 24x7x365 – with real-time remediation capabilities.

**SilverSky takes care of defending your organization – while you take care of business.**

### SilverSky Cybersecurity – At A Glance

## Five Services That Strengthen Your Security Posture

SilverSky has the most comprehensive set of enterprise-grade cybersecurity services in the industry. From detection to response and remediation, we deliver the cybersecurity coverage you need – when you need it.

1

### Managed Detection & Response

Monitors, investigates, and disrupts advanced threats in real-time inside the perimeter – across DNS, AD, email servers, security devices, and endpoints.

2

### Security Device Management

Extends threat protection beyond traditional perimeters to address security challenges along the modern network edge, including cloud and mobile networks.

3

### Managed Endpoint Detection & Response

Delivers visibility into your growing endpoint environment, with detection and remediation supported by machine learning.

4

### Email Protection Services

Guards the #1 attack vector against phishing, malware, and ransomware attacks that threaten infiltration and compromise.

5

### Vulnerability Management

Identifies and prioritizes vulnerabilities using a risk-based approach, guides remediation, and performs validation scans to confirm success.

## The Power Behind Our Services

### **Adaptive Analytic Detection (AAD)**

SilverSky Lightning platform reviews security data based on more than 250 behaviours. Its machine learning detection recognizes anomalies and finds what others miss to help security teams stay ahead of attackers. We call it Adaptive Analytic Detection (AAD)

Silver Sky MDR applies leading technology, deep analytics, machine learning and automation and military-grade threat intelligence to streamline the volume of data feeds created by devices in your environment.

### **Security Operations Centers**

Three state-of-the-art SOCs – located in North America, Europe, and Asia – serve as command centers that centralize the activity feeds from all of our security services. Integrated enterprise-grade technologies, automated tools, and threat intelligence support our skilled SOC analysts, who provide active monitoring of your environment 24x7x365.

### **Integrated Technology Foundation**

Our powerful platform includes the latest, best-in-class security operations technologies, proprietary solutions, and custom integrations that power our security services and SOCs. The result? Affordable, on-demand access to powerful, integrated security technologies that keep your organization safe – without the complexity of having to implement, run, and maintain them yourself.

**SilverSky MDR stands vigilant to defend your business so threats wont get in your way.**
